Objective

Detail-oriented and proactive Software Engineering student with strong foundations in Java, data structures, object-oriented programming, and web development. I am seeking a role where I can contribute to building scalable internal systems and deepening my experience in software development.

Education

Grossmont College (2025) – San Diego, California – Associate Degree in Computer Science / Software Engineering

- Focus: Advanced Java, Data Structures, and Web Technologies

Fiap School (High School) – 2022, Sao Paulo, Brazil

Technical Skills

Languages: Java, JavaScript, SQL

Technologies/Tools: Git, GitHub, PostgreSQL, IntelliJ IDEA, VS Code

Frameworks/Libraries: Spring (in progress), Hibernate (in progress), React (in progress), Node.js (in progress), Angular (in progress)

Concepts: Object-Oriented Programming (OOP), Multi-threading, Client-Server Architecture, Blockchain basics, Data Structures

Strengths

- Effective communicator and team collaborator
- Passion for understanding and improving internal tools to enhance productivity
- Able to quickly understand and apply unfamiliar programming tools or frameworks when needed

Certificates

- The Complete SQL Bootcamp: Go From Zero to Hero (Udemy, 9 total hours)
- The Complete Git Guide: Understand and Master Git and GitHub (Udemy, 23.5 total hours)
- Api and Web Service Introduction (Udemy, 7 total hours)
